---

PROFESSIONAL PROFILE

AI Product Builder with a background in medical microbiology, self-taught into software and AI product development. Designs, builds and ships web platforms and booking systems with AI tools (Cursor, Claude, Codex), n8n workflow automation and cloud deployment on Netlify and Vercel. Delivered live projects in healthcare, real estate and the beauty sector, combining conversion-focused interface design with booking integrations and version-controlled development to take each product from concept and design through to a live, working platform.

PROJECT EXPERIENCE

AI Product Builder | Quick Smile [View Project] *October, 2026*

- Organised 67 services into 8 care categories with live search and clear new-patient fees.
- Built with AI tools (Cursor, Claude), version-controlled on GitHub and deployed on Vercel.
- Designed and shipped a mobile-first, 5-step dental appointment flow with a WhatsApp handoff.

AI Product Builder | The Nailicure Beauty Brand [View Project] *July, 2026*

- Set up a direct-to-calendar booking flow that captures client leads and booking requests.
- Designed a premium brand landing page focused on visual design and a clear path to booking.
- Built responsive for mobile and desktop with AI-assisted development and deployed on Netlify.

AI Product Builder | Prime Property [View Project] *May, 2026*

- Designed and built a responsive digital real estate platform for browsing property listings.
- Developed with AI-assisted tools and managed every change through Git version control.
- Deployed to production hosting on Netlify and optimised the deployment for accessibility.

CORE SKILLS

- **Design:** UI/UX design, responsive and mobile-first interfaces, clear user journeys
- **Workflow Automation:** AI workflows and business automations built with Grokbot
- **AI-Assisted Development:** Cursor, Codex, Supabase; HTML, CSS, JavaScript, GSAP
- **Version Control & Deployment:** Git, GitHub, Netlify, Vercel (hosting and production releases)
- **Booking Systems:** Reservation flows, calendar integration, lead capture and WhatsApp handoffs
- **Conversion Design:** Booking funnels, clear calls to action and conversion-focused landing pages

Current Focus: Building an Agentic Saas platform that answers customer messages on WhatsApp for hotels, restaurants and clinics, using approved business information and handing conversations to the owner when needed.

EDUCATION

Bachelor of Science (B.Sc.) in Microbiology **2020-2024**
Nnamdi Azikiwe University, Awka, Anambra.
